DETAILED ACTION

Allowable Subject Matter

1. Claims 23-43 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 23,34,37, and 40, which include, wherein the method further comprises the steps of outputting a final image when the distance from each corner of the image to the edge of the pupil is equal to each other and wherein the method further comprises the steps of determining the size of the pupil by calculating an average darkness level in the pupil and using this average as a defining threshold for determining the area of the pupil (claim 23); and comparing the determined size and location to a predetermined size and position and outputting a final image if the size and location matches the predetermined size and position (claims 34 and 37); and determining a distance from each corner of the image to the edge of the pupil along two diagonal paths, each diagonal path defined by two diagonally opposing corners of the first image (claim 40) (note: claim 23 allowed previous office action).
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
